COMMENTS

Love developing Software in general, Open Source in special, self-taught person and problem solver searching the personal and technical excellence.

I founded Open Source Weekends to help people enjoy coding as I do.

Teamplayer, Team is such important as the product they code. (or more)

Agile eXtreme Programming advocate, TDD with a great team and easy solutions drive the product to success.

April-2019 to Now

- Python developer over **Google App Engine**
- Developing new features, fixing bugs, test covering, Agile XP consulting

FICTIZIa

September-2017 Now

- Vanilla Javascript teacher.
- Advanced Python teacher.
- Keep teaching as second job because love it.

alea soluciones

October-2017 April-2019

- As a part of the team, we had to, code new features and maintain a 8 years old platform.
- Transform a Python2 to Python3 service.
- Dockerize and deploy in more than 2000 machines, solving system problems over ssh.
- Develop solutions for internet protocols such as "OMAPI".
- All in a eXtreme Programming Agile work, where there weren't a boss or a lead, and everything had to be team decided.

KUBIDE

February-17 October-17

- Team lead.
- **Node + Python + MongoDB** developer all in **Docker**.
- My mission as a lead was encourage team mates to be the best version of themself, giving them whatever they need to success, and being the responsable when something didn't go as expected.

SKILLS

In order of mastering:

- Python/ Tornado/Flask/Sanic
- Extreme Programming (TDD, Pairing, Agile Principes, Continuous Delivery)
- Team player.
- Docker
- SQL, NoSql databases
- NodeJs
- Unix
- Golang
